SUMMARY

Full-stack Software Engineer and Computer Science graduate building production-grade web applications with the MERN stack, TypeScript, and Next.js. Currently working as an Associate Software Development Engineer, delivering end-to-end features, integrating LLMs into real-world products, and contributing to open-source projects.

EXPERIENCE

Associate Software Development Engineer

June 2026 – Present

INGSOL LLP

- Own end-to-end delivery of full-stack features across React.js, Node.js, Express, and MongoDB, from design through deployment.
- Lead bug triage and resolution on production modules, improving reliability and reducing recurring issues.
- Resolve merging conflicts and uphold Git branching and code-quality standards across the team.
- Drive feature decisions and break work into shippable increments within an Agile workflow.

Software Development Intern

Feb 2026 – June 2026

INGSOL LLP

- Built and shipped full-stack features on a React.js, Node.js, and MongoDB stack, taking tickets from spec to production.
- Optimized React components and API calls, cutting page load time by 20%.
- Diagnosed and fixed bugs in existing components, improving application stability.
- Collaborated through Git pull requests, code reviews, and Agile ceremonies.

PROJECTS

AI Interview Mocker

Next.js, Google Gemini (LLM), Firebase, Node.js

- Integrated the Google Gemini LLM to generate dynamic, role-specific interview questions with real-time, personalized feedback, using prompt templates to keep output structured.
- Added voice-enabled responses and instant AI scoring, reducing mock-interview preparation time by 40%.

TrendBazaar – E-commerce Platform

Code · Live

React.js, Node.js, Express, MongoDB, Redux, Cloundinary

- Built a fully responsive e-commerce platform with product browsing, filtering, cart, wishlist, and secure checkout.
- Implemented JWT-based authentication and a role-based admin panel, and optimised MongoDB queries and Cloundinary media delivery for faster processing.

InfoWaste – Smart Waste Reporting Platform

Code

MERN, Socket.io, Tailwind CSS

- Built a platform that scans garbage via uploaded images and sends real-time, location-tagged reports to municipal authorities for faster resolution.
- Implemented live status updates with Socket.io and a responsive reporting UI.

Ripple – Open-Source State Manager (npm)

Code

TypeScript, React, tsup

- Authored and published an open-source, zero-dependency state-management library to npm with direct-mutation updates, fine-grained path subscriptions, and built-in undo/redo (time travel).
- Shipped a framework-agnostic core plus a React adapter, full TypeScript types, and a tested ESM + CommonJS build.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Auth, Socket.io

Databases: MongoDB, MySQL, PostgreSQL

Generative AI: LLM Integration (Google Gemini), Prompt Engineering, LangChain, RAG (Retrieval-Augmented Generation), Vector Databases (ChromaDB), Embeddings, AI Agents, Function Calling

Tools & DevOps: Git, GitHub, Docker, npm (package publishing), Agile

Cloud: AWS (basic), Vercel, Render

EDUCATION

IMS Engineering College, Ghaziabad, UP

Sept 2022 – May 2026

B.Tech. in Computer Science — GPA: 8.78/10

Dr. MKK Arya Model School, Panipat, Haryana

Class 12th: 90% (2021–2022) · Class 10th: 92% (2019–2020)

CERTIFICATIONS

- DSA Pre-Placement Training — Skillrisers Infotech Pvt. Ltd.
- HTML & CSS for Web Developers — The Digital Adda
- Data Analytics Using Python — Skillrisers Infotech Pvt. Ltd.
